Chitkara University
Punjab, India
Bachelor of Technology, Computer Science, July 2017 (CGPA: 7.8)

Kundan Vidya Mandir, CBSE Board
Punjab, India
Senior Secondary Education, Non Medical, July 2013 (Score: 82.4%)

EXPERIENCE

User Interface (UI) Designer
Kony Labs, Hyderabad, India
August 2017 - Present
Supported the Kony product team in the design of a new early-stage product. Assisted in UX research activities such as data collection and analysis. Instrumental in helping visually communicate research findings via posters and other material, which is part of a broader effort to make UX research more visible at Kony.

Led the creative direction for all projects Gathered and documented design requirements and communicated with Product Managers and Engineering Managers. Created wireframes and prototypes. Designed interfaces and user experiences for a key account.

Fulfilled multiple project requests while simultaneously meeting tight deadlines like Base camp and Marketplace for Kony. Implemented user flows, interactions and experiences that are simple, intuitive and consistent across web and mobile platforms.

Experienced agile development, design in our own tool named Visualizer worked in this platform from V7- V9. Collaborated with the rest of the engineering team to launch new features for the enhancement of company tools.

Incorporated data-driven insights, user feedbacks, technical constraints and usability findings into user-centric designs. Demonstrated ability to analyse an application and launch Apps like Kony App Viewer and Kony Enterprise store on time.

Associate Designer
Kony Labs, Hyderabad, India
August 2016 - August 2017
Gathered knowledge of technical products or families of technologies working by the company. Learned the ability to think creatively while maintaining accuracy and attention to detail. Performed routine assignments in entry-level of the professional career band. Acquired knowledge of key use cases which were required to work in the company environment. Practical automated testing experience and the bug raising across all platforms.
